

RESUME

- **NAME:** Sivakumar Reddy KASA
- **Date of Birth:** January 1st 2003
- **Phone no:** +91 8500617104
- **Gmail:** kasasivakumar104@gmail.com
- **Address:** KPHB, Hyderabad

OBJECTIVE.....

Dynamic and results-driven Data Science professional with expertise in Python, data analysis, and machine learning, specializing in transforming data into actionable insights and building predictive models. Seeking to join a forward-thinking organization to contribute to data-driven decision-making and innovative analytics projects. Eager to collaborate in a fast-paced, research-oriented environment, leveraging strong analytical, statistical, and problem-solving skills to support the organization's digital transformation and business intelligence initiatives.

➤ EDUCATION

- Bachelor's Degree in **B TECH (CSE)** from THE ICFAI UNIVERSITY, Raipur CGPA: 66%
- **Intermediate** complete from Board of intermediate in Sri Chaitanya junior college, Guntur, Andra percentage : 63%
- **SSC** complete from Sun shine high school, Darsi, Andra Pradesh percentage : 83%

➤ SKILLS

- **Analytical Tools:** Power BI, Tableau, Advanced Excel,
- **Programming Languages:** c, c #, object-oriented program (oops), python , Machine leaning, Deep Leane,
- **Frameworks :** pandas, NumPy, matplotlib, scikit-learn
- **Database:** MySQL, SQL
- **Tools& ides :** visual studio , anaconda Navigator, Jupiter Notebook
- **Others:** Data structure and algorithm, problem solving ,

CERTIFICATIONS

- Certificate in Data science internship purple technology
- Certificate in data analytics internship
- Course complete Data science and data analysis certificate in Udey

INTERNSHIP.....

- *I worked as a data science at a purple technologies company five months*
- *I worked as a data analysis at a grow ai three months*

PROJECTS.....

Airbnb Data Analysis, Business Analytics

- Implementation of data mining techniques to gain insights in business, helping Airbnb to rise in the market.
- Built Models using Decision tree, Neural Networks, Logistic Regression to analyse KPI's behind the determination of price of a room for the new hosts and predicted about 19% profit.

Statistical Analysis using EXCEL

- Evaluated sample data set using outlier analysis, boxplots, V-lookup, Chi-square, Normal and T-Distribution.

Countdown Clock , Timer and Alarm Clock

- *Developed a Python-based Countdown Clock, Timer, and Alarm Clock application, enabling users to set time-based functions for reminders, tracking, and alerts.*
- Leveraged precise alarm features by integrating the datetime library into existing, resulting in streamlined notification processes that improved user response times to alerts by reducing delays to less than one second.

Contactless IoT Object Detection Counts

- Designed and implemented a contactless IoT object detection system using Python to integrate hardware, database, and web technologies.

The project involved:

- Programmed using Arduino IDE to upload code in the Arduino Board by interfacing with an ultrasonic sensor for real-time object detection.
- Developing a Python application to handle data processing, MySQL database connectivity, and dynamic webpage updates.
- Creating a user-friendly web interface using embedded HTML, CSS, and Python for live monitoring of object detection counts.
- Implementing real-time updates on the webpage and parallel storage of detection records in the MySQL database.
- This project expertise in IoT hardware integration, database management, and web development with Python

Cloud Technologies, Cloud Computing (AWS)

- Using AWS Cloud formation building a public cloud including a production Webserver.
- Simulating an Internet invasion into the webserver, compromising the EC2 instance.
- Integrating AWS cloud security services for automatically notifying security team via email to take actions.

Mobile Application for Bank, Agile Project Management

- Developed a Scrum project by building Project Charter, Product Backlog, Product Release Plan, Sprint Planning, implementing in JIRA and CONFLUENCE and preparing Gantt Chart in MS Project for each Activity.
