

RESUME

Sivakumar Reddy Kasa | Hyderabad, India | +91 8500617104 | kasasivakumar104@gmail.com

Professional Summary

Entry-level Data Science graduate with a strong foundation in Python, data analysis, and machine learning. Hands-on experience in exploratory data analysis, predictive modelling, and data visualization using Power BI and SQL. Seeking an opportunity to contribute to data-driven decision-making in a growth-oriented organization

OBJECTIVE

- Strong foundation in Python programming and data handling using Pandas and NumPy
 - Practical knowledge of Machine Learning algorithms such as Regression, Classification, and Clustering
 - Basic understanding of Deep Learning models including ANN, CNN, and RNN
 - Hands-on exposure to NLP techniques like text preprocessing, tokenization, TF-IDF, and sentiment analysis
 - Familiar with Generative AI concepts, prompt engineering, and Large Language Models (LLMs)
 - Ability to visualize data insights using Power BI, Tableau, and Matplotlib
 - Experience working with MySQL and SQL databases for data storage and querying
 - Comfortable using Jupyter Notebook, Anaconda, and Visual Studio for development and analysis
 - Good problem-solving skills with a continuous learning mindset
-

Education

Bachelor of Technology (B.Tech) – Computer Science Engineering

ICFAI University, Raipur

2021 – 2025 | Percentage: 66%

Intermediate (Class XII)

Sri Chaitanya Junior College, Guntur, Andhra Pradesh

Board of Intermediate Education | Percentage: 63%

Secondary School Certificate (SSC – Class X)

Sunshine High School, Darsi, Andhra Pradesh

Board of Secondary Education | Percentage: 83%

SKILLS

- **Programming:** Python, C, C#
 - **Data Analysis:** Pandas, NumPy, Excel
 - **Machine Learning:** Scikit-learn, Regression, Classification, Clustering
 - **Deep Learning:** Neural Networks, ANN, CNN, RNN (Basics)
 - **Natural Language Processing (NLP):** Text Preprocessing, Tokenization, TF-IDF, Sentiment Analysis
 - **Generative AI:** Prompt Engineering, Large Language Models (LLMs), Text Generation (Basics)
 - **Data Visualization:** Power BI, Tableau, Matplotlib
 - **Databases:** MySQL, SQL
 - **Tools & IDEs:** Jupyter Notebook, Anaconda, Visual Studio
-

CERTIFICATIONS

- **Data Science Internship Certificate** – Purple Technologies
 - **Data Analytics Internship Certificate**
 - **Data Science & Data Analysis Course Certificate** – Udemy
-

Projects

Airbnb Data Analysis – Business Analytics

- Applied data mining and exploratory data analysis to extract business insights for Airbnb market growth.
- Built predictive models using Decision Tree, Logistic Regression, and Neural Networks to analyse key pricing KPIs.
- Identified pricing patterns for new hosts, contributing to an estimated **19% profit improvement**.

Statistical Analysis Using Excel

- Performed data analysis using **outlier detection, box plots, VLOOKUP, Chi-square test**, and probability distributions.
- Analysed datasets using **Normal and T-Distribution** to derive statistical insights.

Countdown Clock, Timer, and Alarm Clock (Python)

- Developed a Python-based application for countdown, timer, and alarm functionalities.
- Implemented time-based automation using the **datetime library**, ensuring accurate alerts.
- Improved alert response efficiency with delays reduced to **less than one second**.

Contactless IoT Object Detection System

- Designed and implemented a contactless object detection system integrating **IoT hardware, Python, database, and web technologies**.
- Programmed Arduino using **Arduino IDE** and interfaced an ultrasonic sensor for real-time object detection.
- Developed a Python backend for data processing and **MySQL database integration**.
- Created a dynamic web interface using **HTML, CSS, and Python** for live monitoring.
- Enabled real-time data updates and parallel storage of detection records in the database.
- Gained hands-on experience in **IoT integration, database management, and Python-based web development**.

Cloud Technologies – AWS Cloud Computing

- Built a public cloud infrastructure using **AWS CloudFormation**, including a production web server.
- Simulated a security breach by compromising an EC2 instance to analyse vulnerabilities.
- Integrated AWS security services to automatically notify the security team via email during incidents.

Mobile Banking Application – Agile Project Management

- Developed an Agile-based project following **Scrum methodology**.
- Created project artifacts including **Project Charter, Product Backlog, Release Plan, and Sprint Plans**.
- Managed tasks using **JIRA and Confluence** and prepared **Gantt charts using MS Project**.

Energy Consumption Prediction (ECP)

- Analysed energy consumption datasets to derive actionable insights and optimize energy usage.
- Understood business objectives and accessed client-provided datasets.
- Performed data cleaning, preprocessing, and handling of missing values to ensure data quality.
- Conducted **Exploratory Data Analysis (EDA)** to identify patterns, trends, and outliers.
- Created visualizations and analytical reports for non-technical stakeholders.
- Engineered new features to enhance model accuracy and performance.
- Selected, trained, validated, and fine-tuned machine learning models based on business requirements.
- Evaluated model performance using appropriate metrics to ensure robustness and generalization.
- Improved data collection processes to support advanced analytics systems.
